After being "charged" with the chemicals it is always ready for use. It was fairly tested on Wednesday evening at the paint of was Kowloon Bay. A large quantity of loose ataven, broken oil basks, and other highly combustible matter was heaped together, the whole being saturated by fifteen gallons of tar. Sufficient time was allowed for the fire to get firm hold. and then the Extinct-ur was tried with complete success. Wherever the fluid came in contact with the flames the "extinguishing", was instartaneous. In order to thoroughly test it the flames were allowed again to ascend in great volume, but immediately on application the effect was the same. It is well worthy the attention of the authorities, especially as the formation of a Fire Brigade is under discussion; The cost of the one under notice, in Hongkong, including 12 charges of the chemicals, in from 165 to \$75.
